
Niche Themes
depot location
k−means clustering
parcel distribution
e−commerce
driver workload
environmental sustainability
Motor Themes
ant colony optimization
multi−depot vehicle routing problem
multiple trips
delivery efficiency
delivery deadlines
autonomous robots
battery replacement
delivery routing
on−demand delivery
customer assignment
covid−19 pandemic
linear programming
vehicle routing optimization
reinforcement learning
genetic algorithm
facility location
electric vehicles
crowdshipping
bi−level optimization
delivery consolidation
level of service
urban distribution
branch−and−price
multimodal transport
rural logistics
vehicle routing
urban logistics
metaheuristic algorithms
lower bounds
task allocation
local search
online food delivery
order batching
delivery cost reduction
customer satisfaction
cost minimization
simulation−based optimization
branch−price−and−cut
winner determination
multi−armed bandits
delivery delays
Emerging or
Declining Themes
demand uncertainty
nsga−ii
Basic Themes
Development degree
